

```
int light=13;

void setup()
{
    pinMode(light,OUTPUT);
}

void loop()
{
    int resistance=analogRead(A0);
    if(resistance<400)
    {
        digitalWrite(light,HIGH);

        delay(1000);
    }
    else
    {
        digitalWrite(light,LOW);
    }
}
```
